

App interface ideas

Mobile app and PC access

Sam Langdale

passport integration??

Sam Langdale

Clean and responsive UI

Sam Langdale

A map display showing parking availability that is indicated by shades of green and red.

Sam Langdale

App Functionality

You need to scan a QR code on the meter or the spot to mark it as taken

Sam Langdale

camera for detecting how many spots are taken?

Sam Langdale

Pay for paking in app

Sam Langdale

meters use camera to indicate a spot is taken and reports it

Sam Langdale

When you leave you indicate you are leaving in the app

Sam Langdale

App benefits compared to normal parking

work with UOFSC for parking in garages or any decal lots

Sam Langdale

any decal lots have workers who mark the lots are full so they can indicate in the employee part of the app if the lot is closed

Sam Langdale

recommend a certain parking garage or street to park based off data

Sam Langdale

indicate when you have to pay for parking and when parking is free

Sam Langdale

reserved parking and the time and date of effective can be indicated in app

Sam Langdale

we could indicate parking for Sporting events with their cost and availability

Sam Langdale

data about traffic at certain times can be accounted for and reported to the user in app

Sam Langdale

Questions and Concerns

How would you “take” a spot?

Sam Langdale

Would this app fix parking enough to be viable?

Sam Langdale

how would we account for those not using the app?

Sam Langdale

dealing with Passport( Competitor )

we can buy parking lots and require our app for parking

Sam Langdale

how will our app be better than passport (the most used app for parking in cola) ?

Sam Langdale

we could have our own meters that are directly integrated into our app

Sam Langdale

Most parking that are put up by locals don't use passport so we could take apart of that market from them.
